HUMBER EVENTS

Project We Got

Humber College holds lots of events for students, teachers, and the community. They cover all kinds of topics like Academic stuff, Social events, and career related events.

Humber events currently use Eventbrite to manage these events because they lack a dedicated website. Therefore, Humber Events approached our team, Creative Creatures, to develop a website for them.

Vision

Our vision for the Humber Events website is to create a one-stop place where people can easily find, explore, and sign up for all the upcoming events at Humber College. We want the website to be user-friendly and exciting, just like Humber itself. By doing this, we aim to boost participation and excitement for all events within the Humber community.

The Problem

Past problems faced by Humber for their event platform

Lack of Control

Limited Customization

Dependency

Our Competitors

We took inspirations from the current competitors and made a website that could fulfil all the needs of the users and give the best user experience

ticketmaster

eventbrite

Week 5

Mood board

Humber Event

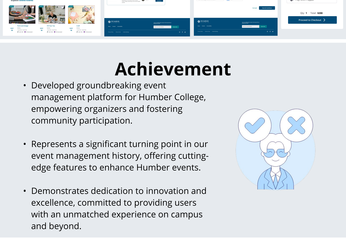
This is what we made

Our company, Creative Creature, has made the Humber event website. With this design, we aim to showcase our commitment to leveraging technology to improve the event experience and assist Humber College in its event management endeavours

Website Features

We integrated some features

- AODA Support
- Ticket Tracking
- Registration Tracking
- Administrative Dashboard



Achievement

- Developed groundbreaking event management platform for Humber College, empowering organizers and fostering community participation.
- Represents a significant turning point in our event management history, offering cutting-edge features to enhance Humber events.
- Demonstrates dedication to innovation and excellence, committed to providing users with an unmatched experience on campus and beyond.

Thank you
